

DANIEL SHAULOV

Economics & Management Student

052-7356540 • danielshaulov4@gmail.com • Sderot, Israel

Summary

Economics and Management student at the Open University of Israel with a strong analytical and technological orientation. Highly proficient in data processing and analysis using Excel (including PivotTables and VLOOKUP), SQL and Power BI, and experienced in building end-to-end data projects in Python - from cleaning and querying raw data to visualizing it and drawing actionable conclusions. Combines practical programming knowledge with advanced AI tools for workflow optimization and automation. Passionate about translating data into clear, decision-ready insights, with a particular interest in financial markets and economic analysis. Characterized by logical thinking, rapid self-learning abilities, and optimal performance in dynamic, high-pressure environments.

Experience

Team 3

Security & Access Control 2023 - Present

- Managing access procedures for employees, suppliers, and visitors.
- Maintaining facility security and conducting routine inspections.
- Providing professional service and guidance to staff and site visitors.

"Midor Ledor" Association

Military Prep Coordinator 2022 - 2023

- Managed preparation programs for youth, including scheduling and goal setting.
- Delivered training sessions while developing leadership skills.
- Performed multi-tasking under pressure and met organizational objectives.

Israel Defense Forces

Combat Soldier - Nahal Brigade 2020 - 2022

- Operated advanced technological systems in demanding field conditions.
- Applied rapid decision-making and developed strong self-discipline and accountability.
- Collaborated within a tight-knit team on mission-critical objectives, building resilience and the ability to deliver under pressure.

Education

The Open University of Israel

Economics and Management Student 2025 - Present

Amit Gutwirth High School

Full Matriculation Certificate 2013 - 2019

Projects

📈 Ethereum Macro Analysis

A five-year (2021-2026) study of Ethereum's returns, risk, and correlations with Bitcoin, the NASDAQ-100, and the US Dollar Index, testing whether ETH acts as a dollar hedge. Computes risk-adjusted metrics (CAGR, Sharpe, Sortino, drawdowns) and runs correlation and regression analysis to quantify how ETH moves against each asset.

Tools: Python (Pandas, NumPy, SciPy), yfinance for market data, Matplotlib & Seaborn, Jupyter Notebook.

👤 Customer Behaviour Analysis

An analysis of 580 customers and 19 products that pinpoints where store revenue comes from and where it leaks - uncovering that abandoned-cart value exceeded captured revenue. Segments customers by spend and behaviour, measures conversion and time-to-purchase, and turns the findings into targeted, actionable revenue-recovery recommendations.

Tools: Python (Pandas), SQL (SQLite) for KPI queries, Matplotlib & Seaborn, Power BI dashboard.

Skills

Data & Analytics: Excel (Pivot, VLOOKUP, Models) • SQL (Queries, Joins) • Power BI (Dashboards) • Python (Pandas, NumPy) • Matplotlib & Seaborn • Data Cleaning • Exploratory Data Analysis • Statistical Analysis

AI & Programming: Java & Python • AI Automation • AI Tools: Claude Code, GPT • Prompt Engineering

Finance & Economics: Capital Markets • Financial Statements • Microeconomics • Macroeconomics
